Ortronics offers a full line of designation and labeling solutions designed to meet the requirements of the TIA/EIA-606 Standard, including LabelMo® Software—the most user-friendly labeling software on the market. Ortronics provides the installer with a complete selection of high-quality performance-proven structured cabling installation tools backed by one of the most trusted names in the industry.

LabelMo® Designation Software

Ortronics LabelMo is a Windows® 95, 98, 2000, NT, and XP compatible software program designed to work with our micro perforated laser sheet-fed paper stock. The color-coded stock separates cleanly for use in the designation fields of workstation outlets, patch panels, 110 cross connects and interface cords. Once the labeling sequence information has been entered into the program's prompt fields, it can be used to output labels for station outlets, as well as corresponding front and back of patch panels. LabelMo's intuitive operation is simple to master and gives you complete control.
